

# SUMMER TIME!

*Fast, natural summer edits*

*Guide*

## THANK YOU!

Thank you for your decision to get our preset warm brownie. We really hope you enjoy the product and if you don't, send us a mail and we will help!

## THE SUPPLEMENT

This Preset is the perfect supplement for our "Warm Brownie" Preset! We always use them in combination. They both give off the same vibe while one always works when the other doesn't.

This is best used for bright, sunny days and warm brownie for everything else.

## BASIC RULES

This one is pretty easy, you apply it and change Exposure and tweak the white balance to your liking. That's it! If you really want to, you can read our notes on skin tones down below.

## NAILING SKIN TONES

*A quick note on Summertime!*

Make sure you always have the correct white balance and you won't encounter many problems. Most of the time, you won't need to change a thing using this preset!

Some people have more red tones in their skin and if you have such people in your photos or notice too much red tones, scroll down to your HSL Tab in Lightroom and drag the red hue slider more towards the right. Then, scroll down to the red luminance and increase it.
